PROFESSIONAL EXPERIENCE

Senior UI/UX Designer | **AlighTech Solutions** | 09/2024 – Present

Led the full UI/UX design process from user research and strategy to high-fidelity designs and delivery. Established scalable design systems, ensured cross-platform consistency, and collaborated with cross-functional teams to create innovative, user-centered digital experiences that improved engagement and usability.

Senior UI/UX Designer | **Makook** | Freelance

Designed intuitive and responsive user interfaces by conducting user research, creating wireframes and prototypes, and contributing to the development of a consistent design system. Worked closely with developers and stakeholders to deliver engaging and efficient user experiences across platforms.

UI/UX Designer | **DigitalApps** | 08/2023 – 08/2024

Assisted in designing user-friendly interfaces by supporting research, wireframing, and prototyping tasks. Contributed to responsive layouts and followed established design guidelines while collaborating with developers to implement clear and engaging user experiences.

PROJECTS

Sales-TC Dashboard & App — Dashboard & SalesRep Mobile App

Led the end-to-end design of **Sales-TC**, a sales representatives management platform. Conducted business analysis, defined UX strategy, and designed the UI to support key workflows for sales representatives, supervisors, and administrators. Designed the mobile app for sales reps along with the management dashboard, enabling efficient tracking of sales activities, performance monitoring, and streamlined reporting.

Facility Management Dashboard — Operations & Maintenance Management Platform

Led the UI/UX design of a Facility Management dashboard to streamline operations and maintenance workflows. Designed interfaces for managing work requests, scheduling and tracking planned maintenance, and monitoring site attendance. Focused on creating clear dashboards and user flows that help administrators and operations teams efficiently track tasks, manage field activities, and improve

Yaqeen Dashboard & App — Multi-role School Fleet Management Platform

Led the UI/UX design for Yaqeen, a school fleet management platform serving multiple user roles. Designed the management **dashboard** along with the **Parent** and **Driver** mobile apps, enabling real-time bus tracking, route management, attendance monitoring, and communication between parents, drivers, and administrators. Focused on creating intuitive user flows and responsive interfaces to ensure safety, transparency, and efficient transportation management.

Digital Apps Website — Software Company Landing Page

Designed the UI/UX for the Digital Apps website, creating a modern and responsive landing page for a software company. Focused on clear information architecture, engaging visuals, and user-friendly navigation to effectively showcase the company's services, portfolio, and value proposition while improving user engagement and lead generation.

Select App — Multi-service Mobile Application

Designed the UI/UX for **Select App**, a mobile application that provides multiple on-demand services within the same city, including grocery, markets, beauty salons, and pharmacies. Created intuitive user flows that allow users to easily browse service categories, view ratings and reviews, and access special offers and promotions within the app. Focused on delivering a simple and engaging experience that helps users quickly find and book the services they need.

Bank EISa3ada App — Community Happiness Sharing Platform

Designed the UI/UX for **Bank EISa3ada**, a mobile application affiliated with the UAE Ministry of Happiness. The app allows users to share inspiring content such as articles, wisdom quotes, recommended books, and acts of kindness. Focused on creating a simple and engaging social experience that encourages positivity, knowledge sharing, and community participation.

Q-Wallet App — FinTech Payment App (UX Campaign Case Study with Tremoloo)

Developed a UX case study for **Q-Wallet**, a digital payment application concept similar to Instapay, created as part of a UX campaign with Trello. Designed the user experience for sending and receiving money, paying utility bills such as electricity, and managing simple financial transactions. Focused on building a secure, intuitive flow that makes everyday payments and transfers fast and easy for users.

TherapyEase App — Mental Health Booking Platform (UX Campaign Case Study with Tremoloo)

Developed a UX case study for **TherapyEase**, a mental health platform designed to help users easily find and book appointments with psychologists and therapists. Designed user flows that allow patients to browse specialists, schedule sessions, and attend consultations online. Focused on creating a supportive, private, and easy-to-use experience that encourages users to access mental health care comfortably and securely.
